jason.schramm@gmail.com

jruns.github.io

Curious web developer who loves to learn.

Creative problem solver who can fix anything.

PROFESSIONAL EXPERIENCE

TechnologyAdvice, Remote (Full-time)

Senior Web Developer | August 2022 – January 2025

Web Developer | July 2021 – July 2022

Maintain and modify 40+ high-traffic WordPress websites with custom themes, plugins, and web services. Customize commercial WordPress plugins and themes. Work with Gutenberg Blocks, Full Site Editing, and the Block Editor. Implement 3rd-party APIs. Work with various business stakeholders to solve their technical issues and add desired website functionality. Coordinate the work of multiple developers on projects. Optimize database queries and page load performance. Analyze and improve Core Web Vitals and SEO performance. Manage Cloudflare and AWS Route 53 DNS, and troubleshoot server performance. Create and modify Github Actions. Review and enhance legacy systems. Regularly review the WordPress Core code base to find obscure hooks to implement desired functionality. Document processes. Mentor junior developers.

Veg Groups, Remote (Part-time)

Lead Software Developer | 2016 – Present

Plan, design, develop, implement, and maintain web sites utilizing HTML5, CSS3, Bootstrap, JavaScript, jQuery, RESTful APIs, PHP, MySQL, and Git.

Customize commercial WordPress plugins and themes. Design and build custom WP plugins and themes. Integrate third-party services and APIs. Develop custom tools for staff to perform their jobs faster and easier. Design logos and other graphics. Optimize sites for performance and speed. Maintain and administer web servers, databases, DNS, and Cloudflare configuration.

Department of Homeland Security, Washington, DC (Full-time)

Senior SharePoint Developer | 2015 – 2019

Developed web sites that integrated with the SharePoint environment by utilizing HTML5, CSS3, Bootstrap, jQuery, jQuery UI, RESTful APIs, SPServices, and Nintex Workflows. Mentored junior developers.

U.S. Army, Aberdeen Proving Ground, MD (Full-time)

IT Specialist | 2007 – 2015

Served as the project lead and developer for multiple projects. Built custom SharePoint functionality. Provided administration, development, and end-user support for multiple SharePoint customer portals. Led the planning, management, and implementation of new software tools and applications.
