PROFESSIONAL EXPERIENCE

TechnologyAdvice, Remote (Full-time)

Senior Web Developer (July 2021 – January 2025)

Supported a portfolio of over 40 sites for a B2B Software and Media Company.

- » **Stack:** WordPress, PHP, SASS, JavaScript, Vue, Docker, AWS, Cloudflare, Fastly, Google Ad Manager, Google Analytics, Google Tag Manager
- » Customized commercial WordPress plugins and themes.
- » Built custom WordPress plugins and themes.
- » Worked with business stakeholders to plan new features, solve technical issues, and add site functionality.
- » Documented processes, and regularly communicated with and trained various departments.
- » Coordinated the work of multiple developers on projects.
- » Monitored traffic and server performance, and optimized database queries and page load performance.
- » Monitored security and kept server software up-to-date. Investigated and mitigated hacking attempts.
- » Managed DNS and hosting environments.

Engineering Initiatives

- » Led the Web Optimization functional area that was responsible for plugin and Core updates, Core Web Vitals monitoring and page speed improvements, site migrations, Ad loading improvements, hosting environment improvements, support ticket responses, and technical emergency response.
- » Led the stabilization and continued maintenance of a high-traffic news site with over 9 million user accounts and payment API integrations.
- » Led the migration of all WordPress sites from WP Engine to an AWS Kubernetes cluster.
- » Created a plugin that could be extended to add new features to our sites. This reduced costs by replacing the use of several plugins, improved server performance, and reduced site errors.
- » Created a plugin for disabling ads based on specific criteria like a posts author or primary category.
- » Created a plugin to replace the use of a paid commercial ads plugin, which enabled greater flexibility to change ad configurations and resolved several ad delivery issues. Coordinated closely with Ad department during the development and deployment of the utility to ensure that their needs were met.

SKILLS

Project Planning	Web Development	Server Management	Ad Management
Time Management	WordPress Development	DNS Management	Analytics
